EuroSoft® live for CAPBs® - Windows

Benefits

- Free Windows software for all CAPBs® sensor modules
- Live indication of the measured values, also as line chart
- Menu-guided measurements
- Data logger function for logging measurement data
- A picture from the media library of the PC/notebook can be added to each measurement
- Easy generation of measurement records as PDF or csv file
- Firmware update
- Configuration and visualisation of logging processes (in conjunction with CAPBs® Interface Logger IF 20)

NEW

Available for Windows

Application

EuroSoft® live is the free Windows software for operation of all CAPBs® sensor modules with a Windows PC. Logging processes can be conveniently configured, read and processed with a CAPBs® device and the Interface Logger IF 20. In addition, the software can be used to update the firmware of the CAPBs®.

Versions

	Part no.
Software EuroSoft® live for Windows	560024
Module USB-A for PC Bluetooth® Smart dongle for PC application EuroSoft mobile/connect	500856

Blue part no. = in-stock items

Description

The CAPBs® modules communicate with the Bluetooth® or a USB connection (base handle CAPBs® device). The software allows for "remote control" of the sensor modules and for "live" indication of the measured values in application programs. Comprehensive measurement results can be conveniently visualised, stored as PDF measurement logs and shared.

Operating systems:

Windows 10 or higher
