

Condensate collector KS

Benefits

- Highly corrosion-resistant
- Level alarm possible via floating probe

Application

Used to buffer major amounts of condensate.

Versions

	Part no.
Condensate collector KS	61798
Condensate collector KS-A with liquid level sensor	61799

Blue part no. = in-stock items

Description

The 10 l condensate collector is used if automatic condensate removal is not possible or desired. It can be equipped with a float switch and the appropriate electronics.

Technical specifications

Material

Plastic (PE)

Dimensions

460 x 200 mm

Table of Contents

10 l

Weight

500 g

Cover

Screw cap Ø 7 cm

Connections

Condensate: Compression fitting Ø 4 x 1 mm

De-aeration: Compression fitting Ø 4 x 1 mm
