

Condensate bar

Benefits

- With condensate trap for visual inspection - easy to drain
- Compact, robust design made of high-strength, weather-resistant plastic
- Compatible with hoses with 4/6 mm inside diameter
- Tightness-tested
- With integrated bracket for easy wall mounting
- AFRISO quality product – manufactured in Germany

Application

For the protection of vacuum type leak detectors used on double-walled tanks to avoid ingress of condensate liquid into the device or clogging of hoses.

Versions

	Part no.
Condensate bar	43692

Blue part no. = in-stock items

Description

Condensate bar with three condensate traps for visual inspection, with integrated bracket for easy wall mounting. If there is no steady gradient in the measuring, exhaust and suction lines from the leak detector to the tank, a condensate bar must be mounted at each lowest point of the lines. When condensate forms, the liquid is collected in the relevant condensate trap. The condensate traps can be easily unscrewed for emptying.

Tightness-tested

Compact, robust design made of high-strength plastic

Compatible with hoses with 4/6 mm
