EuroSoft® connect for BlueLine - Windows

Benefits

- Free Windows software for all BlueLine handheld measuring instruments
- Direct Bluetooth® connection via PC or Bluetooth USB dongle
- Live indication of the measured values with line chart
- PDF measurement report with customer data, company logo and signature field
- Recorded measured values are available in CSV format (Excel)
- Creation of customer database on the microSD card
- Creation of address header for EUROprinter hardcopy
- Remote control with indication of the display

Application

Measured values are transmitted to the PC with the EuroSoft® connect software. For processing and visualisation of measurement results and logs of the BlueLine measuring instruments.
