

Gas Detector GSP 4

Benefits

- Fast and reliable detection of flammable gases
- Sensor for a wide range of flammable gases (base calibration: methane)
- Sensor protection for long service life
- Flexible gas probe for use in spaces difficult to access
- Audible alarm if limit values are exceeded

Application

For detection of gas leaks (flammable gases) in gas pipes as well as connection pieces and fittings, gas meters, gas burners and gas tanks. The intensity of the escaping gas is indicated by the three LEDs. At the same time, the instrument generates an audible signal whose frequency is proportional to the gas concentration. Preset limit values.

Versions

Gas Detector GSP 4	503502

Blue part no. = in-stock items

Technical specifications

Measuring range (methane)

0/2,000 ppm

Sensitivity (methane)

> 50 ppm

Operating temperature range

Ambient: 0/40 °C

Storage: -20/+50 °C

Hours of operation

10 Stunden

Weight

158 g with battery

Dimensions

W x H x D: 45 x 158 x 39 mm

Flexible arm with probe: 234 mm

be:

Indicator

3 LEDs

Supply voltage

2 x 1.5 V AAA batteries

2 x AAA NiMH battery
