

Capacitance level switch CapFox® ENT 21

Benefits

- Easy adjustment via magnetic pin
- IP 68 degree of protection
- For temperatures of the medium of up to 300 °C
- EX version suitable for mining

Application

For level detection of conductive and non-conductive liquids in tanks, ducts, pipes or silos. Particularly suitable for application in the food, pharmaceutical and chemical industries. Also ideal for level detection of bulk solids such as sand, gravel, cement and granular material stored in open or closed containers.

Versions

Description

The capacitance level switch CapFox® ENT 21 consists of an electronics module integrated in a robust stainless steel housing and the measuring electrode. The electrode is partially or fully insulated; in conjunction with a conductive tank wall or an earthed counter-electrode, it forms a capacitor whose capacitance depends on the electric characteristics of the environment. As soon as the dielectric (electric field) is no longer formed by a air or a another gas (free electrode), but by a liquid or the bulk solids, the capacitance changes. This is converted into a switching signal by the electronics. An NPN or a PNP transistor output is available as electrical output. The sensor output of the EX version complies with EN 60947 (NAMUR).

Fully or partially insulated rigid probes or flexible probes are available, depending on the medium and the application. Only fully insulated electrodes are used for level detection of adhesive, corrosive or electrically conductive media.

Technical specifications

Indicator

LED green: Operation
LED orange: Status

Process connection

G1B
G3/4B
¾" NPT
Tri-Clamp DIN 32676, ø 34 mm
Tri-Clamp DIN 32676, ø 50.5 mm

Material

Housing: Stainless steel 304
MS: Stainless steel 316 L
MF: Stainless steel 316

Supply voltage

DC 7 – 34 V
Load current: Max. 300 mA

Switching point adjustment

Adjustment via magnetic pin, included

Current input

Max. 5 mA without load

Degree of protection

IP 68 (EN 60529)

Electrical connection

Cable gland M12 x 1.5 with fixed cable connection
Cable length: 2 m

Weight

ST version: Approx. 0.3 kg
HT version: Approx. 0.6 kg

Scope of delivery

- CapFox® ENT 21 according to configuration
- Magnetic pin
