

# CAPBs® set tightness test underfloor heating system PT 70-FBH

### Benefits

- Set for pressure tests as per BTGA und DIN EN 1264-4 of under-floor systems for heating and cooling
- Test media water or air
- Test adapter (G¾ female) for direct connection to the manifold system
- Standardised quick-action coupling system for easy test setup
- Can be modularly extended for DPK 60 sens series
- Pressure transmitter PT 70 (0/25 bar)
- Easy test and PDF documentation via applet "Tightness test" in the EuroSoft® live app

**Bluetooth®**

### Application

- Tightness tests at underfloor systems for heating and cooling
- For liquid, gaseous and corrosive media

### Versions

	Part no.
CAPBs® set tightness test underfloor heating system PT 70-FBH	P00040
Handle CAPBs® module BG 10	M091000017

Blue part no. = in-stock items

### Description

Ready-to-be-used set in system case S pressure transmitter PT 70 (25 bar), connection accessories and suitable test adapter (connection cap) for direct connection to the manifold system. Flexible, uncomplicated connection to the pipe sections to be tested by means of standardised quick-action coupling system.

## Technical specifications

### Dimensions (W x H x D)

Sensor module: 42 x 74 x 35 mm  
Case: 260 x 63 x 155 mm

### Interface

Bluetooth®

### Hours of operation

Bis 32 Stunden  
Battery operation with CAPBs® BG 10

### Measuring range

0/25 bar

### Hose connection

1 x Plug connector DN 5

### Scope of delivery

- Drucktransmitter CAPBs® sens PT 70, 0/25 bar
- Test adapter G $\frac{3}{4}$  female with plug-in nipple DN 5
- Adapter for compressor connection
- Connection hose 0.3 m
- T connector (2 x quick-action coupling / 1 x shut-off valve with plug-in nipple DN 5)
- System case S
